

SCOTTISH WHISKY - SPEYSIDE

The capital of whisky production in Scotland - Speyside whiskies fall into three styles: light & floral, medium bodied, or rich & robust. Often tannic, spiced and a distinct note of dark fruits, the shared complexity and elegance that come from this region are what drive its popularity.

SCOTTISH WHISKY - LOWLAND

Often grassy and floral with notes of jasmine and honeysuckle flower, as well as light toffee characterise the whiskies produced here. The Lowlands is the home to more distillation than any other region, however the majority of the whiskies produced in this area go towards creating blended whiskies.

Suffering a similar hit to American whiskies in terms of having to deal with war and prohibition, not to mention the poor-quality spirit that flooded the market in the 18th and 19th centuries, earning the region a bad reputation. Thus, forcing many of the distilleries to 'fall silent' or sell to other distilleries hence its inclusion in many blended whiskies.

SCOTTISH WHISKY - ISLANDS

Island whiskies very often embody a distinct salinity due the proximity to the ocean and are often described as 'volcanic'.

There is a distinct heather and smokey malt personality to Island whiskies.

SCOTTISH WHISKY - ISLAY

Islay, the Queen of Peat. Home to nine distilleries, with others being built or reopened, and known primarily for producing peaty, lush and verdant whiskies. The main source of fuel on the island is peat, hence its traditional use throughout the production of Islay whiskies.

A product of its environment, Islay whisky often has notes of seaweed, salt, carbolic soap, Lapsang Suchong, moss and heather. One of the most popular whisky regions, likely for the strength of its character.

Very much a divider, people quickly picking their tribe, 'Peat Freaks' or 'Anything but Islay's!'.

One for the connoisseurs, please don't hesitate to ask for advice regarding these complex liquids.

AMERICA

What started as a rough and ready spirit; created lawlessly, surviving prohibition, war, and adapting to the forces of nature, has been refined to the point of elegance over the years. Rules to ensure consistency in production and a recognisable character have been set, the result, flawless liquid. Since the 19th Century the evolution of Bourbon production means at least 51% of the mash bill must be corn, the distillate can be no higher than 80% abv, of which must be put into new charred white oak casks at no higher than 62.5%. From there nothing but water may be added.

IRISH

Owing its distinct character to a tax dodge, Irish whiskey is every bit the cheeky dram you'd expect. Often characterised for its exceptionally smooth complexity, grassy, apple, vanilla and aromatic spice notes. This due to their methods of double or triple distillation and the use of Pot Stills.

Irish whiskey has undergone a resurgence. The country that once produced so much whisky the Scots developed sanctions that brought the industry to its knees, is now releasing greater and greater whiskies.

JAPANESE

Japan has a near 100-year history of making whisky, with its story rooted firmly in Scotland from the late 1800's when trade relationships were established. In the early 1900's expertise was gathered from distilleries in Scotland and taken back to Japan to begin their whisky journey. Today their spirit is a beautifully crafted, heritage product that has its roots in seasonality, craft, precision and delicate but multi-layered flavour profiles.

Flavours of citrus, green tea, lemongrass and honeysuckle.

ENGLISH

Over the last few years we've seen a rise in malt whisky being made in England. We don't have the heritage of our whisky-making neighbours of Ireland and Scotland, as historically England was known for grain production with the last distillery closing in 1904. But the tide is turning. Along with the behemoths of The English Whisky Company and The Cotswolds, a raft of distilleries - 27 at last count - are snapping at their carefully crafted heels and laying down casks. From Cornwall right up to Durham, distilleries are currently heating up their stills with more in the planning.
